Summer 2026

Independent Study

- Working as a 3D and 2D artist on a multi-level game
- May-July 2026
- An action, rough-like fighting game with a unique black and white art style and animations

Development Pieces

Working on the project will allow me to hone my skills by practicing all art related skills, from texturing to asset creation.

3d model creation

creating around 9 to 15 unique 3d models in an appropriate game style.

2d asset creation

creating textures for all made assets, as well as UI elements for the game and any extra needed work

Objective

This independent study opportunity is important as its a great opportunity to get more 3D and 2D modeling practice, as well as expanding my knowledge of texturing and creating game-ready assets for the project.

Motivation

- Creating portfolio-worthy pieces
- Learning new skills
- Understanding the independent game development process
- Gaining experience
- Working as a team effectively
