Unity 6 Random Gen

- Random.Value
 - ↳ Floating Value between 0.0 - 1.0
 - ↳ Does this include numbers like 0.11234? Yes
- C# Uses a 32-Bit Float Single Precision
- Random From Array
 - Use Random.Range function
 - Var element = myArray[Random.Range(0, myArray.Length)];
 - Length Starts cant from 1 ↑ Includes This
 - ↑ Excludes This

Idea for Pirate Noir

- For each level I want to have each enemy type. But the most common enemy type should match the ship difficulty.
- Randomly gen # of enemies $X-10$; $X=4$. When on the last ship $X+2$
- X will equal the # of main enemy type there is depending on difficulty
- Populate the scene with enemys, this could be a loop. Ran gen an enemy difficulty from an array. Then spawn into game.
- create one array with each enemy difficulty opt
