

Jordon Dubin

Tech Artist

jo040440@ucf.edu

ID: 5511923

Summer 2026

Independent Study

- Working as a Tech artist on a multi-level game
- May-July 2026
- Action Roguelike fighting game with fish-hook like system that would have interactive UI and Animations

Development Pieces

By working on each subject this will allow me to learn how to work with other roles and how to implement my assets into other aspects of the game. I also have the goal to create a suitable portfolio piece to showcase my skills.

Implementing UI

To make a accessible and relevant looking UI that has all customization abilities present. Without unnecessary clutter

Implementing Animation

Setting up dynamic animations with enemy and player Hud as well as for cutscenes

Animated Main Menu

The goal to make and implement a dynamic and interesting UI menu with animations for the main screen and for each button

Cutscenes

Making unique game cutscenes using my experiences/knowledge in video production as well as my expiernce with cinemachine within unity.

Objective

This topic is important to me because of my desires to work with code, UI, and game design. This adds portfolio expierence for UI work that I have recently found great enjoyment in as well as practice making cutscenes for my own game.

Motivation

- Learning new skills
- Broadening my skills
- Making pieces for my Portfolio
- Learning better Teamwork Strategies
